## Vivarium hygrometer with 70mm dial

This 70mm dial vivarium hygrometer effectively and easily monitors humidity levels. The humidity level is critical in keeping your reptiles or amphibians healthy and stress-free. It's simple to read and instal. Maintaining proper temperature and humidity levels in a terrarium is critical for all reptiles and amphibians' well-being and health. This product has an analogue dial display and an easy-to-follow coded humidity scale that ranges from desert to moderate to tropical on a simple 0 to 90% humidity scale.
