

HAWK DUO Automated video and optical measuring system | 200 mm x 150 mm Measurement Range | Up to 1000X Magnification

Hawk Duo is an excellent option for precision engineers as it combines the repeatability and practicality of digital video measurement with the dependability and high accuracy of an optical measuring microscope into one sturdy system.

Hawk Duo has higher magnification objectives and a precision measurement stage with coarse and fine movement controls for measuring minuscule details with accuracy. With a 3-axis CNC control, it can carry out quick, programmable measurement routines.
