

LVC SERIES Fully automated 3-axis measurement systems | Up to 400 mm x 300 mm measurement range

The fully automated 3-axis CNC video measuring systems, LVC400 and LVC200, are incredibly powerful and versatile, making them ideal for demanding manufacturing environments. They are also surprisingly simple to operate. Easily measuring large components or batches of small components, LVC has a measurement range of up to 400 mm x 300 mm x 200 mm.

The motorized zoom lens with multiple positions enables adjustments to be included in the measurement program, removing the need for laborious manual adjustments to the magnification.
