Kennedy KEN5180080K | 8" SPRING TYPE DIVIDERS | SOLID NUT

produced using premium polished steel. A tiny adjustment screw is affixed across the legs to modify the distance between the two ground finishing points. The legs are joined by a circular spring bow, to which is affixed a knurled extension that is used to pivot the dividers. Dividers are used to draw arcs and circles. The pivot leg remains in the center of the mark when a light center punch mark is applied to the work.

Specifications	Details
Туре	Spring Calipers
Material	Steel
Range	0 - 8 in.
