

Kennedy KEN5583320K | Side Cutters, Steel | 160mm

This series of diagonal cutters is made to deliver more strength at the point while yet fitting into tight locations. It has a bonded vinyl-coated handle, a double polished head and joint, and an induction hardened cutting edge. To facilitate tight cuts to a flat surface, the cutting edge is angled slightly with respect to the handles. offered in three sizes to accommodate different demands.
