

## Apera Instruments 12.88 mS/cm Conductivity | Conductivity Standard Calibration Solution | Capacity 500ml

At 25°C (77°F), the high-purity chemicals that make up the Apera Instruments 12.88 mS/cm Standard Conductivity Calibration Solution are standardized to NIST-certified benchmarks. It is perfect for calibrating conductivity meters of various kinds. The temperature and conductivity reference table is included on the bottle labels for your reference because temperature has an impact on conductivity value. Every solution has a one-year shelf life, is double-sealed, and is exempt from DOT shipping regulations. The bottle has an expiration date printed on it.
