

Dronco 115xM14 J-AK CERAMIC FLAP DISC P40

Flap disc with glass fibre reinforced plastic backing. Ceramic grain abrasive on polyester cloth. Fully resinoid bonded with fillers for active grind support. Self-sharpening ceramic grain for extremely high, permanently available stock removal as well as a long service life. For the processing of steel and stainless steel, high-alloy steels, chrome and chrome nickel steel, titanium alloys, brass and bronze.

Specifications	Details
Features	Air-cooled with cooling slots integrated in the backing, Cool grinding on surfaces and edges, Permanent extremely high stock removal, Robust polyester backing, Self-sharpening
Bore Diameter	22 mm
Maximum Operating Speed	13,280 rpm
Backing Material	Glass Fibre-Backed (General-purpose, non-scratch).
Grit	P40
Abrasive Material	Ceramic
Disc Diameter	115 mm
Product Number	5111424
Weight	1
Standards Met	Complies to oSa Regulations, Manufactured according to EN 13743
SKU	DRN2202300GTSA
Disc Type	Conical (Type 29)
Bore Thread Size	M14
Brand	Dronco
